Offshore Company Registration

Editor: Consultant Michelle, [Beijing Tannet Consulting Company Limited](#)

Key words: [Offshore Company registration](#), [Offshore company registry](#), [Offshore corporate formation](#), [Offshore company formation](#), [Offshore company setup](#)

[Offshore company](#) investment is the keeping of money in a jurisdiction other than one's country of residence. Offshore company jurisdictions are a commonly accepted solution to reducing excessive tax burdens levied in most countries to both large and small scale investors alike. Selected offshore domiciles are superficially viewed by some as havens used to conceal or protect illegally acquired money from law enforcement in the investor's country. Although this may occasionally be the case, legitimate investors also take advantage of higher rates of return or lower rates of tax on that return offered by operating via such domiciles. The advantage to this is that such operations are both legal and less costly than the solutions offered in the investor's country - or "onshore". Locations favored by investors for low rates of tax are known as offshore financial centers or (sometimes) tax havens.

Offshore company solutions are accessible to anyone who can meet the minimum investment amount or pay the obligatory fees required to open such an entity.

[Offshore company](#) tax is the driving force behind 'offshore' activity. Due to offshore solutions investors are able to conduct investment activities in a profitable fashion. Often, taxes levied by an investor's home country are critical to the profitability of any given investment. Using offshore domiciled special purpose vehicles an investor may reduce this burden allowing the investor to achieve greater profitability overall.

Another reason why 'offshore' investment is superior to 'onshore' investment is because it is less regulated, and the behavior of the offshore investment provider, whether he be a banker, fund manager, trustee or stock-broker, is freer than it could be in a more regulated environment

We provide service for forming offshore companies incorporated in British Virgin Islands (BVI) and other offshore countries, which are not required to pay any tax in these countries or Hong Kong if they do not have any operations in these countries and HK. Shareholders can be anonymous. An offshore company is not required to have business registration for opening bank accounts in HK.

Reasons for offshore company registration:

Avoidance of forced heirship

Asset protection

Less regulated (for example, hedge funds, which thrive in low regulatory environments due to their highly aggressive investments strategies thrive in offshore jurisdictions, principally the Cayman Islands

Privacy)

Tax advantages (legal)

Money Laundering & Tax evasion (illegal)

Shown below is a link to an October 2007 article in the Australian business press that is generally pro-tax haven:

Confidentiality of offshore company registration

All banks in HK are under the HK law not to disclose any customer's information to any one without the customer's prior consent, except if the customer is suspected for money laundry or criminal offence, or the HK Inland Revenue Department suspects that he/she has evaded HK taxes (not taxes in other countries). Further the HK Inland Revenue Department is not allowed by the HK law to disclose any information to any one, including local or overseas governments.

Better Communication of offshore company registration

We provide virtual office service for your [offshore company](#) - mail forwarding & telephone/fax services (with or without dedicated telephone line & answering in your company name) with all voice/fax messages sent to you by email. A HK company provides a HK telephone number for tape recording of telephone messages and receiving fax per month. All voice and fax messages will be automatically forwarded to your designated email address.

Philosophical reasons against offshore investment:

Wealth earned in one (taxed) economy is taken out of circulation (i.e., it cannot be taxed again when re-spent to provide services and infrastructure).

Ethically, it might be considered an abuse of the notion of national sovereignty that facilitates a lack of transparency to regulators of financial transactions.

It encourages Tax competition between states, provinces, countries, and regions in the way that the search for ever cheaper source of manual labor brings down wages everywhere.
